

MEREDITH'S STORY

When Meredith joined United Way of Midland's Project Blueprint leadership program, she was looking to grow. What she found was a community.

At the Project Blueprint board fair, Meredith was connected to 3:11 Ministries and knew right away she wanted to be part of their mission. She joined their board and got to work, helping the organization apply for United Way of Midland's Innovative Grant.

3:11 Ministries was awarded those funds for their Dorm Project, a program that equips homeless college students at Midland College with essential supplies: bedding, towels, hygiene items, technology, and a few comforts of home, so they can focus on education instead of survival.

Because of leaders like Meredith, students arrive prepared, supported, and ready to build their future.

This is what it means to empower. To collaborate. To thrive, **TOGETHER**.
